### Professional Summary:

- **DevOps Engineer** with **2+ year** of experience in **CI/CD, Software Configuration Management (SCM), Build & Release Management**, and cloud infrastructure management.
- Hands-on experience with **GitHub, Git, and Maven** for source code management, version control, and build automation.
- Strong experience working on **Linux (Ubuntu)** environments for application deployment, server administration, and troubleshooting.
- Experience in designing and maintaining **CI/CD pipelines** using **Jenkins**, including **Master-Agent** architecture for automated build and deployment.
- Proficient in creating and managing **Docker images, Docker containers, and Dockerfiles** for application containerization.
- Experience deploying and managing containerized applications using **Kubernetes on Amazon EKS**.
- Hands-on experience with **AWS services** including **EC2, IAM, EBS, AMI, Amazon ECS, Amazon ECR, and Amazon CloudWatch**.
- Hands-on experience in provisioning and managing cloud infrastructure using **Terraform (Infrastructure as Code)**.
- Knowledge of **Ansible** for configuration management and automation, along with experience configuring and maintaining **Apache Tomcat** servers.
- Strong team player with experience collaborating with **Development, QA, and Operations** teams to support application builds, releases, deployments, and production environments.

### Technical Skill Set:

|                              |                        |
|------------------------------|------------------------|
| Cloud Services               | <b>AWS</b>             |
| Version Control              | <b>GIT</b>             |
| Build Tool                   | <b>Maven</b>           |
| CI/CD                        | <b>Jenkins</b>         |
| Containerization Tool        | <b>Docker</b>          |
| Container Orchestration Tool | <b>Kubernetes</b>      |
| Configuration Management     | <b>Ansible</b>         |
| Infrastructure as Code       | <b>Terraform</b>       |
| Scripting Languages          | <b>Shell Scripting</b> |
| Operating Systems            | <b>Windows, Linux</b>  |

### Professional Experience:

- Working as **DevOps Engineer** in **Meta Intelligo Technologies Pvt Ltd.**, from March 2026 to Present.
- Worked as **Research Associate** in **ReanIn Research and Consulting Pvt Ltd.**, from September-2024 to February -2026.
- Worked as **Research Associate (Internship)** in **ReanIn Research and Consulting Pvt Ltd.**, for 6 months.

## Education Qualification:

- Bachelor's Degree from JNTU Anathapur.

## DevOps Projects Experience: (March 2026 – Present)

**Project:** Enterprise ERP Cloud Migration – Oracle ERP

**Company:** Meta Intelligo Technologies Pvt Ltd

**Client:** KPI Partners

**Duration:** 8 Months | **Team Size:** 10

**Role:** Junior DevOps Engineer

**Environment:** AWS | ECS | ECR | Docker | Kubernetes | Terraform | Jenkins | CloudWatch | Git | Linux.

### Description:

Contributed to the migration of a legacy Oracle ERP application to **AWS**, focusing on containerization, infrastructure automation, **Jenkins-based CI/CD implementation**, and cloud monitoring to improve deployment efficiency and application reliability.

### Key Responsibilities:

- Assisted in migrating **Oracle ERP** applications to **AWS** cloud infrastructure.
- Built, optimized, and managed **Docker images** for consistent application deployments.
- Deployed and maintained containerized applications using **Amazon ECS** and supported **Kubernetes** environments.
- Automated infrastructure provisioning and management using **Terraform**.
- Developed and maintained CI/CD pipelines using Jenkins to automate build, test, and deployment processes.
- Monitored applications, logs, and infrastructure using **Amazon CloudWatch**.
- Managed container images and deployment artifacts using **Amazon ECR**.
- Collaborated with development and QA teams to support release and deployment activities.
- **Troubleshoot deployment**, container, infrastructure, and application issues to ensure application availability.
- Followed DevOps best practices to improve automation, reliability, and efficiency.

## Research Associate Experience: (September -2024 to February -2026)

**Company:** ReanIn Research and Consulting Pvt. Ltd.,

**Role:** Research Associate

**Environment:** Power BI | Jira | Git | Linux | AWS | Jenkins | Docker.

### Description:

Worked as a Research Associate at ReanIn Research and Consulting Pvt. Ltd., conducting market research, data analysis, and report preparation. Collaborated with the **DevOps team** on **deployment assistance**, environment monitoring, **release coordination**, and application support to ensure efficient software delivery and operations.

## Key Responsibilities:

- Conducted secondary market research, analyzed industry trends, and prepared research reports, presentations, and business insights for clients and internal stakeholders.
- Collected, validated, and maintained large datasets to ensure data accuracy, quality, and reliable market analysis.
- Collaborated with the **DevOps** team to support application deployments and release activities across **Development, QA, UAT, and Production** environments.
- Assisted in monitoring and troubleshooting **CI/CD pipelines** using **Jenkins**, ensuring smooth build and deployment processes.
- Supported source code management and release coordination using **Git**, maintaining version control and deployment consistency.
- Performed basic Linux server administration and deployment troubleshooting on **Ubuntu/Linux**, ensuring application availability.
- Assisted with **Docker** container deployments and provided operational support for **AWS (EC2, IAM, EBS)** infrastructure and environment validation.

## DECLARATION

I hereby declare that all the information provided above in the resume is true, complete, and correct to the best of my knowledge and belief.
